

RTK Towers

RTK bases play a significant role in the support plans we offer you. With our growing number of RTK correction bases, we now serve you with one of the biggest RTK networks in the state.

RTK Base Stations

Loaner/Downtime Priority

Our commitment to provide you with a large inventory of precision ag equipment means that you will never be down when it matters most. We carry an extensive line of displays, receivers, RTK radios, harnesses, brackets, and more.

Integrated Solutions Technology Support

Why AMS

Whether you want to gather information, reduce input and labor costs, increase efficiency or better manage your land and water resources, Bader & Sons can help. Our Ag Management Solutions encompass the diverse needs of today's producers. Across the U.S. and Canada, more and more producers are using precision farming technologies in their operations. Since the late 1990's Bader & Sons Co. has been at the forefront of this revolution.

Ag Management Solutions deliver Year-round application, faster field performance, reduced input costs, stronger yields, and more. Employ any of the groundbreaking Ag Management Solutions from our full product lineup, and watch your bottom line grow. From the moment the tires hit the soil to the last harvest of the year, this advanced, yet user-friendly technology is ready to make you money, year after year, in all areas of your business. With AutoTrac™, a GreenStar™ 3 2630 Display and a StarFire™ 3000 Receiver, you have the tools you need to unlock more efficiency and more profit, throughout the year. And with JDLink™, Remote Display Access, APEX™ and Mobile Farm Manager, you can stay on top of your equipment, operators and data from your laptop, smartphone or tablet.

John Deere FarmSight™

John Deere FarmSight is a complete solution for your farm. It combines your equipment and John Deere's technology offerings with customized services from Bader & Sons Co. John Deere FarmSight solutions can help you easily gather and access data about your machines and your fields. Intelligent, automated equipment brings more precision, convenience and uptime to your operation.

Technology Support

Bader & Sons Co. now offers support to bridge the gap between your machine and the information that will help to yield bigger and better crops. Whether it's creating you're A/B lines, calibrating your combine, or importing prescription maps from your partnered agronomist, we offer customizable support packages to help you maximize your machinery and precision farming systems.
